

MAXI is an LED floodlight developed for indoor and outdoor applications, combining a compact housing with a clean, functional design. The aluminium housing and adjustable mounting bracket simplify positioning where installation space is limited and allow light to be directed towards the target area. The compact form reduces the space occupied on the mounting surface. Model selection should consider the application's lighting requirements and installation conditions together with power, beam angle and supply voltage. Technical values and connection details for the relevant variant are provided in the tables below; installation should follow the product's technical drawings.
