

JUMBO JX-1000 is an LED floodlight combining a space-saving, compact design with high lighting performance. Its clean housing design supports a practical, orderly layout where installation space is limited.

IP66 protection and an adjustable mounting bracket support application-specific positioning indoors and outdoors. A choice of power ratings, beam angles and power supply options allows the appropriate variant to be selected for each lighting project.

Built with Nichia LED technology, the JUMBO series brings compact dimensions and powerful, reliable illumination together. Mounting dimensions and variant-specific technical data are provided in the drawings and tables below.
